52 Hassan Block, Nishter colony, Ferozpur road Lahore, Pakistan

---

With 6 years of software development experience, including a year as a Team Lead at a startup, I specialize in the MERN stack. My expertise extends to React.js, Express.js, Node.js, Angular, .NET, MongoDB, and SQL. I have a strong background in Agile methodologies, ensuring efficient processes and high-quality results in professional environments.

---

## Work Experience

### Staples Canada | Feb 2024 – Present

Senior Software Engineer

- Working as Full stack Developer to maintain and develop a large scale product.
- Coding of system components according to design specifications, corporate standards and best practices and solution design
- Implemented the detailed application design of the system provided by the application Architect.
- Participated in design and code walk-through for review and incorporate feedback into design and code artifacts

### MountSol | Jul 2022 – FEB 2024

Team Lead

- Migrated an already implemented solution from AngularJS to Angular 8.
  - Designed and implemented Managed Service Provider.
  - ITBoost helped 1500 organizations in managing their companies and all the related information at one place through proper logs and third party integrations.
  - Teamwork to manage the tasks efficiently in order to meet tight deadlines while maintaining the high quality standards.
  - Designed and Implemented educational, accounting and delivery solutions.
  - Learned the industrial standards and continued growing as an independent developer as well as a team player.
- 

## Education

### BS Information Technology | [2014 - 2018]

Punjab University college of Information Technology

Lahore, Pakistan

---

## Projects

### Ajwa E-commerce

- E-Commerce web for online shopping
- Shop, return, order management, stats, user management

#### Tools & Technologies:

Next.js, Postgres, Bootstrap 5, Redux, AWS

### La Quinta Resort

- Vacation and event planning on resorts
- Workspaces, tenant, sub-tenant management and switching for admin and client.
- Places, rooms, events, restaurants, categories and subcategories management

#### Tools & Technologies:

ReactJs, Node.js, MongoDB, Material Design, Redux, AWS

### School Finder

- MVP for finding nearby schools
- School management, parent profile and manage children, search nearby schools, admission and fee processing, ratings and reviews.

#### Tools & Technologies:

React Native, Google places, Firebase

## Rameen San

- Automated restaurant ordering, preparation and accounts.
- QR scanner, menu, offers, deals, tracking, payment, settings and accounts management

### Tools and Technologies:

ReactJs, PHP, MySQL, Material Design

## PrognosUS

- Community health app for dementia patients
- Create a community based on dementia stage, determined by dynamic assessment, where they can discuss their challenges and get support from the community.
- Patient management and recovery.

### Tools & Technologies:

ReactJs, AWS Amplify, Twilio, Form.io, DynamoDB, Bootstrap, CI/CD

## TN-Visa

- Automated process for US Visa application, for both individual and family
- Step by step guidance and verification for each user
- Dynamic forms, payment gateway, case handling, ACL

### Tools & Technologies:

ReactJs, AWS Amplify, Form.io, Postgres, twilio, RoR, Stripe, Figma

## TaxTaker

- Fintech app which helps to save upto \$0.5M each year in taxation.
- Client management, year wise records, third parties integrations, task base tracking - Admin can request for specific data by creating a unique link with required modules.

### Tools & Technologies:

Angular, MySQL, RoR, AWS, Hubspot, Figma, Angular Material

## Ucardia

- A management system which allows hospitals to track and maintain the Health of heart patients.
- Seamlessly track patient activity and health and keep motivated through streaks, achievements and daily goals.
- Patient community and health provider interaction via chat, audio and video calling

### Tools & Technologies:

ReactJs, MySQL, Node.js, Express, Figma, twilio, GCP, REST API.

## IdentifyU

- AI based web app which helps in finding a happier, peaceful and meaningful life.
- Dynamic forms, user management, stats, reports and runtime assessments.

### Tools & Technologies:

ReactJs, Postgres, twilio, ROR, Stripe, Figma

## TaxTaker

- Fintech app which helps to save upto \$0.5M each year in taxation.
- Client management, year wise records, third parties integrations, task base tracking - Admin can request for specific data by creating a unique link with required modules.

### Tools & Technologies:

Angular, MySQL, RoR, AWS, Hubspot, Figma, Angular Material

## Ucardia

- A management system which allows hospitals to track and maintain the Health of heart patients.
- Seamlessly track patient activity and health and keep motivated through streaks, achievements and daily goals.
- Patient community and health provider interaction via chat, audio and video calling

### Tools & Technologies:

ReactJs, MySQL, Node.js, Express, Figma, twilio, GCP, REST API.

## CareSnap

- A platform for agencies to maintain their patients and health providers - COVID assessment and daily reporting to agencies.
- Hours logging, shift coverage and earning management

### Tools & Technologies:

ReactJs, NodeJs, Express, MySQL, AWS, REST API, CI/CD
